Gabriela Buil Clancy
Frontend Developer

About

I'm inspired by the connection between technology and creativity to bring purposeful projects to life. As a Frontend Developer, I enjoy creating intuitive and engaging digital experiences. I'm adaptable, collaborative, and enjoy working in teams to achieve a balance between aesthetics and functionality.

Experience

Pérez-Molina Website — *2024 - 2025*
- Corporate website for a pianist duo, designed to showcase their musical career.
- Developed with Vite, React, TypeScript, and CSS, integrating a Strapi-based CMS and an API built with Node.js. The project follows the Agile methodology and is managed through Git.

Software Developer Intern - BrainGaze — *2024 - 2025*
- Development of a mobile app featuring a video game built with Unity and C#. I was responsible for UX/UI design, asset and interface creation, as well as debugging and testing — identifying and fixing errors, fine-tuning mechanics, and optimizing performance for a smooth experience.

Projects

Budget App — *2024*
- Financial management application developed with React and React Router.
- Features: Login, budget creation, data submission, expense management form, tables and expense page, budget visualization in cards, budget links, user deletion, and toast messages.

Arkanoid — *2024*
- Retro-style game developed using CSS, HTML, and JavaScript.
- Features: Multiple levels, life system, scoring system, pause functionality, Game Over and victory screens, sound effects, and custom visual design.

Task-Timer — *2024*
- Task management and timing tool built with JavaScript, CSS, and HTML.
- Features: Task creation with assigned time, calculation of total worked time and remaining time for created tasks, pause and delete options, mark tasks as completed, automatic state change upon completion, and custom visual design.
